

EMPLOYEE DEVICE

HR Step-by-Step Guide

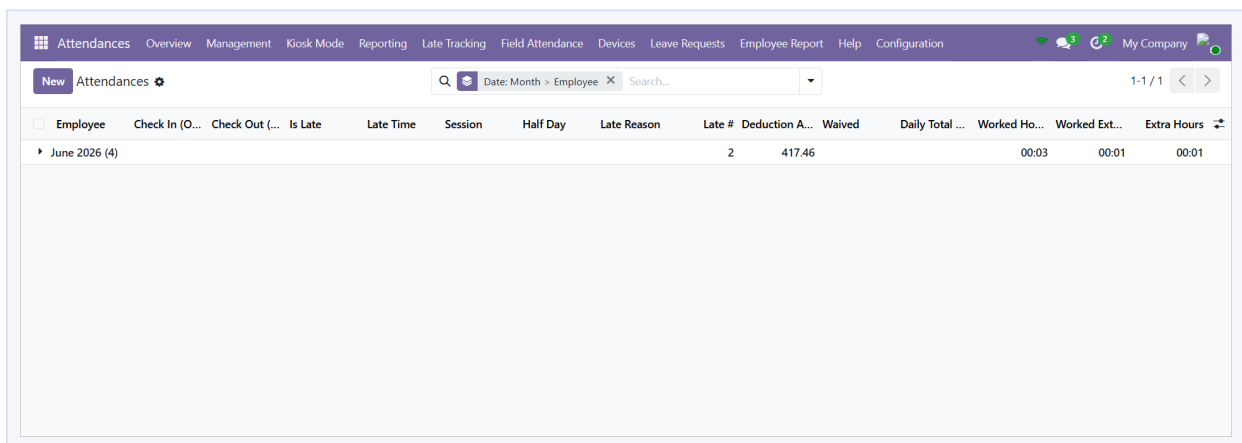

Authorize one phone per employee with a Device ID and PIN, and block lost or replaced phones without losing the record.

A simple guide to authorizing an employee's phone for attendance by registering their Device ID and PIN, keeping one device per employee, and blocking lost or old phones without losing the record.

Module Version 19.0.1.0.0 · Odoo 19 · Human Resources

About Employee Device Management

The Employee Attendance app only accepts a check-in or check-out from a phone that HR has registered for that employee. Each employee has **one device** on file, identified by a 10-digit **Device ID** and protected by a **PIN**. As long as that device is **Active**, the employee can mark attendance from it; turn Active off to block a lost or replaced phone without deleting its history.

The Employee Attendance app — open the Devices menu from the top bar.

How Device Registration Works

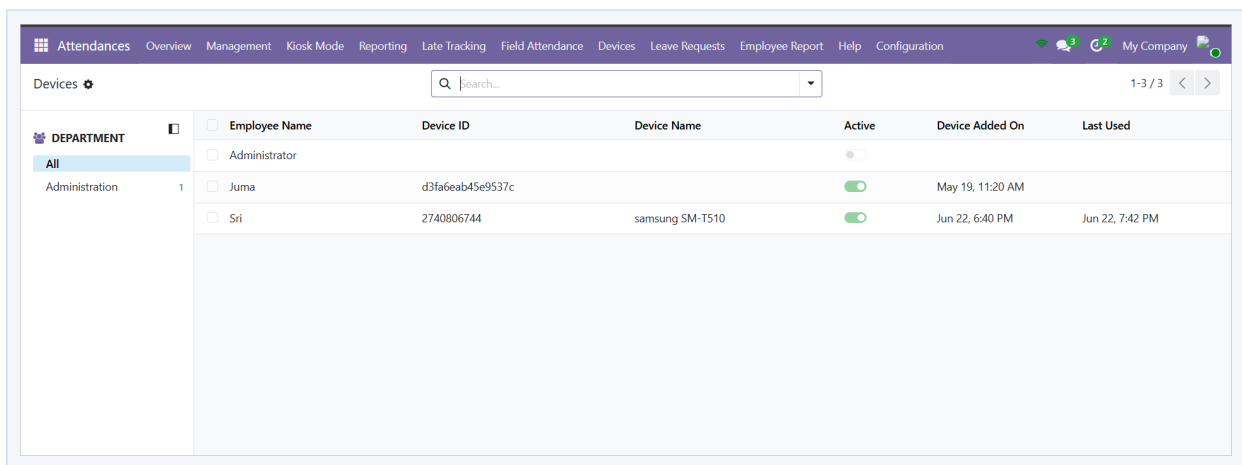

1. Ask the employee for their 10-digit Device ID.
2. Open the employee from the Attendances → Devices menu (this is the only place devices are added or edited).
3. Enter the Device ID and set a PIN.

4. Make sure the device is Active, and save.
5. Device Name and Last Used fill in automatically once the device is in use.

PART 1 OPENING DEVICE REGISTRATION

1 Open the Devices list

In the **Attendances** app, open the **Devices** menu in the top bar (next to Late Tracking and Field Attendance). You'll see a read-only list with one row per employee, showing **Name**, **Device ID**, **Device Name**, **Active**, **Device Added On**, and **Last Used**.

DEPARTMENT	Employee Name	Device ID	Device Name	Active	Device Added On	Last Used
All	Administrator			☐		
Administration 1	Juma	d3fa6eab45e9537c		☒	May 19, 11:20 AM	
	Sri	2740806744	samsung SM-T510	☒	Jun 22, 6:40 PM	Jun 22, 7:42 PM

The Devices list: one read-only row per employee.

2 Open the employee's device form

Click any row to open that employee's device registration form, where you set the **Device ID** and **PIN**. The employee's own **Devices** tab (on their profile) shows the same details but is view-only — devices are added or edited only from the Attendances → Devices menu.

EMPLOYEE

Employee Name: Sri
 Department:
 Job:

DEVICE & PIN

Device ID: 2740806744
 Device Name: samsung SM-T510
 Active: ☒
 PIN: 123
 Device Added On: Jun 22, 6:40 PM
 Last Used: Jun 22, 7:42 PM

REGISTERED DEVICE

Device ID	Device Name	Device Type	Active	Last Used
2740806744	samsung SM-T510	Android	☒	Jun 22, 7:42 PM

The device registration form, opened by clicking an employee row.

PART 2 REGISTERING THE DEVICE & PIN

3 Get the Device ID

The employee has a **10-digit Device ID** for their registered device. Ask the employee to provide it so you can enter it in the next step.

4 Enter the Device ID

In the **Device ID** field, type the 10-digit code exactly as provided by the employee.

5 Set a PIN

Under **PIN Authentication**, set a PIN for the employee. This PIN verifies the employee when marking attendance.

6 Confirm Active and save

Make sure **Active** is switched on, then save. Attendance can be marked only from a registered and Active device.

PART 3 MANAGING DEVICES

8 Block a lost or old phone

To stop a phone from marking attendance, turn **Active** off instead of deleting the device. The record (and its history) stays, and you can switch it back on later.

9 Replace a device

Each employee can have **only one device**. To move an employee to a new phone, update the existing Device ID (or deactivate it first) — adding a second device is blocked.

10 Check recent activity

Use the **Last Used** column or field to confirm a phone is active and being used to mark attendance.

Reference: Device Fields

Field	What it means
Device ID	The 10-digit code that identifies the employee's authorized device.
Device Name	The device's name. Fills in automatically once the device is in use.
Device Type	Android or iOS. Defaults to Android.
Active	Whether the device may mark attendance. Turn off to block without deleting.
PIN	The code that verifies the employee when marking attendance.
Device Added On	When the device record was created.
Last Used	When the device last marked attendance. Fills in automatically.

Things to Remember

IMPORTANT Only one device can be registered per employee. Remove or deactivate the existing device before adding a new one.

IMPORTANT Attendance can be marked only from a registered AND Active device, verified by PIN.

TIP Lost or replaced a phone? Turn Active off rather than deleting — you keep the history and can re-enable it if the phone comes back.
